

Business Investment and Risk Management

Business Investment

Fundamental Approach

Along with strategic business alliances, business investment is an important means of creating new businesses. Based on our strategic goals, we choose the optimal format from a range of methods and investment ratios, such as establishing a wholly owned subsidiary, implementing joint investment with partners, and participating in management through M&A transactions. In principle, we hold assets with a goal of long-term investment. After making each investment, we work to maximize its corporate value and to expand trade and investment return through the full utilization of our Groupwide capabilities.

With larger-scale investments and increases in acquisition prices in recent years, we are rigorously screening the appropriateness of the business plan and acquisition price when we invest. For existing investments, to increase investment earnings and to exit quickly from low-efficiency assets, we are further strengthening monitoring proce-

dures, centered on instituting more rigorous "EXIT" criteria and thoroughly implementing regular investment review.

Decision-Making Process

The department making the application first gives due consideration to such factors as the purpose of the investment, growth strategies, risk analysis, business plans, the appropriateness of the acquisition price, the state of conformance with investment criteria, the establishment of exit conditions, and the status of internal control. Risk analysis includes CSR and environmental checks, such as for labor, environmental, and compliance risks; and checks to exclude antisocial forces in addition to analyze quantitative risk. Next, related administrative organizations implement screening from various specialized perspectives and attach their results to the application. After deliberation by the Division Company Management Committee (DMC), the application is
